PROFESSIONAL SUMMARY

Software Engineer with 2.5+ years of professional experience building scalable web applications, backend integrations, and enterprise e-commerce solutions. Experienced in JavaScript, React, Next.js, PHP, MySQL, REST APIs, and performance optimization, with a strong track record of delivering customer-facing features from development through production deployment.

Skilled in integrating third-party services, optimizing Core Web Vitals, troubleshooting production issues, and working across the full software development lifecycle. Built and deployed multiple modern web applications using React, Next.js, and Supabase while maintaining large-scale commerce platforms serving thousands of users and products.

TECHNICAL SKILLS

Frontend

- React.js
- Next.js
- JavaScript (ES6+)
- HTML5
- CSS3
- Tailwind CSS
- React Query
- Responsive Design

Backend

- PHP 7/8
- Node.js
- Express.js
- REST API Design & Integration
- Supabase

Databases

- MySQL
- MongoDB
- Database Query Optimization

E-Commerce & Search

- Magento 2
- Hyvä Themes
- Elasticsearch / OpenSearch
- RabbitMQ
- Akeneo PIM

DevOps & Cloud

- Docker
- Git
- Bitbucket Pipelines
- Vercel
- Linux
- AWS EC2

Tools & Integrations

- Stripe
 - Razorpay
 - PayPal
 - Google Analytics 4
 - Google Tag Manager
 - Postman
 - Tesseract.js
-

PROFESSIONAL EXPERIENCE

Software Engineer

Sprinx Technolabs Pvt. Ltd. — Lucknow, India *September 2023 – Present*

Frontend Development

- Developed and customized modern frontend experiences for enterprise e-commerce platforms using JavaScript, Hyvä Themes, Alpine.js, and React-based components.
- Built reusable UI components and implemented responsive user interfaces to improve usability across desktop and mobile devices.

Performance Optimization

- Led Core Web Vitals optimization initiatives across multiple production websites.
- Reduced Largest Contentful Paint (LCP) by approximately 30% through image optimization, caching improvements, lazy loading strategies, and frontend performance enhancements.
- Improved Google PageSpeed scores from the 40s into the 70+ range on key customer storefronts.

API Integration & Backend Development

- Integrated third-party REST APIs and payment gateways including Stripe, Razorpay, and PayPal.
- Implemented secure payment workflows and resolved production-critical transaction issues.
- Developed custom Magento modules and backend functionality to support business-specific requirements.

Database & Search Optimization

- Optimized MySQL queries, indexing strategies, and data retrieval processes to improve catalog and search performance.
- Worked extensively with Elasticsearch/OpenSearch implementations and troubleshooting.

DevOps & Deployment

- Managed deployments through Bitbucket Pipelines and Docker-based environments.
- Performed environment migrations, release validation, and production troubleshooting while maintaining deployment stability.

Team Collaboration

- Conducted code reviews and mentored junior developers on development standards and debugging practices.
 - Collaborated with project managers, QA teams, and stakeholders to deliver features within project timelines.
-

PROJECTS

eManager – Expense Tracker PWA

Next.js | Supabase | React Query | Tesseract.js (OCR)

Live Demo: <https://rajshukla-emanager.vercel.app>

- Architected and developed a full-stack Progressive Web Application (PWA) for personal expense management.
- Implemented OCR-powered receipt scanning using Tesseract.js to automatically extract expense information.
- Built secure authentication and real-time database synchronization using Supabase.
- Added offline-first functionality, responsive design, and export capabilities for expense reports.

Developer Portfolio & Technical Blog

Next.js | React.js | Vercel

Live Demo: <https://rajshukla-portfolio.vercel.app>

- Developed a modern personal portfolio and technical blogging platform using Next.js.
- Implemented SEO-focused architecture with dynamic metadata generation and optimized routing.
- Created a markdown-driven blog system supporting technical content publishing.
- Optimized performance using static generation and modern frontend best practices.

YouTube Frontend Clone

React.js | JavaScript | CSS

Live Demo: <https://raj-youtube.vercel.app>

- Built a responsive YouTube-inspired frontend application using React.
- Implemented reusable components, dynamic layouts, and responsive video grids.
- Focused on user experience, component architecture, and frontend performance.

Salon Booking Template

React.js | Tailwind CSS | Framer Motion

Live Demo: <https://rajshukla-salon.vercel.app>

- Developed a responsive business website template targeting salon and appointment-based businesses.
- Created reusable UI components and mobile-first layouts.
- Integrated direct WhatsApp contact functionality to streamline customer inquiries.

KEY ACHIEVEMENTS

- Improved Core Web Vitals and frontend performance across multiple production websites.
- Delivered complex payment gateway integrations for enterprise e-commerce projects.
- Built and deployed multiple modern React and Next.js applications.
- Resolved critical production issues involving caching, search indexing, deployments, and third-party integrations.
- Contributed to high-traffic e-commerce platforms serving large product catalogs and active customer bases.

EDUCATION

Master of Computer Applications (MCA)

Integral University, Lucknow 2021

Bachelor of Science (Computer Science, Mathematics & Statistics)

National PG College, Lucknow 2018

ADDITIONAL INFORMATION

- Strong experience in enterprise e-commerce development and production support.
- Interested in Full Stack, React, Next.js, and Backend Engineering opportunities.
- Comfortable working across frontend development, backend systems, databases, APIs, and deployment pipelines.
