

Raj Pawan Shukla

Software Engineer – Magento 2 & Web Performance

Lucknow, India · +91-6391391377 · rajshukla140@gmail.com
github.com/RajShukla1 · linkedin.com/in/rajshukla18

PROFESSIONAL SUMMARY

Software Engineer with 2.5+ years of commercial experience delivering Magento 2 e-commerce solutions across international and domestic markets. Led full-cycle development on production storefronts — including footwear, industrial supply, home décor, and LED lighting verticals — covering Core Web Vitals optimisation, payment gateway integration, Magento version upgrades, and SEO infrastructure. Experienced in owning technical delivery end-to-end, from client requirement gathering through staging, QA, and live deployment. Brings additional React.js frontend capability and hands-on experience with web analytics and performance tooling.

TECHNICAL SKILLS

Languages	PHP 7/8, JavaScript (ES6+), MySQL, HTML5, CSS3, XML
Platform	Magento 2 CE/EE — module development, theming, checkout customisation, version upgrades, security patches
Frontend	React.js, custom checkout flows, responsive UI
Performance	Core Web Vitals (LCP, CLS, FID), PageSpeed Insights, lazy loading, full-page cache, image optimisation
SEO & Data	Google Analytics 4, Google Tag Manager, Google Merchant Center, structured data, robots.txt, XML sitemaps, canonical tags
Integrations	Payment gateways (Razorpay, Stripe, PayPal), REST APIs, third-party Magento extensions
DevOps	Git, Bitbucket, manual & pipeline-based deployments (staging → production), Linux CLI

PROFESSIONAL EXPERIENCE

Software Engineer – Magento 2 | Sprinix Technolabs Pvt Ltd — Lucknow, India *Sept 2023 – Present*

- Improved Core Web Vitals across 3+ production storefronts — reduced LCP by ~30% through image optimisation, lazy loading, and caching configuration, raising PageSpeed Insights scores from the mid-40s to 70+.
- Integrated Razorpay, Stripe, and PayPal payment gateways in Magento 2, including a React-based custom checkout; diagnosed and resolved critical transaction failures within 24 hours of client escalation.
- Managed Magento 2.x → 2.4.x version upgrades and applied security patches across client environments using Bitbucket pipelines, achieving zero unplanned downtime across all migrations.
- Resolved Google Merchant Center product feed and structured data indexing errors, restoring visibility for an estimated 15–20% of suppressed products in Google Shopping campaigns.
- Configured and debugged Google Analytics 4 and GTM implementations, including custom e-commerce events and data layer corrections, restoring accurate conversion tracking for business reporting.
- Developed and maintained 10+ custom Magento 2 modules across catalogue, checkout, and order management; systematic root-cause analysis reduced recurring production defects by ~40% over six months.
- Established SEO standards across client storefronts — robots.txt, XML sitemaps, canonical tags, and schema markup — adopted as internal team defaults.
- Managed direct client communication across 4+ concurrent international projects, handling requirement scoping, weekly updates, and incident response with an average first-response time of under 2 hours.

- Mentored 2 junior developers through structured code reviews and pair debugging sessions, reducing their PR iteration cycles and improving overall team output quality within 3 months.

CLIENT PROJECTS

Vivobarefoot — www.vivobarefoot.com · Magento 2, PHP, MySQL, GA4, Google Merchant Center

International footwear brand · UK-based e-commerce

- Resolved Core Web Vitals regressions and improved LCP performance across product listing and detail pages.
- Fixed Google Merchant Center feed indexing issues that had suppressed product visibility in Shopping campaigns.
- Implemented GA4 e-commerce tracking and GTM event configuration for accurate purchase funnel reporting.

Newport Fasteners — www.newportfasteners.co.uk · Magento 2, PHP, MySQL, custom modules

Industrial fastener supply · UK B2B e-commerce

- Developed and maintained custom catalogue and pricing modules to support complex B2B pricing rules and bulk ordering.
- Managed Magento version upgrade and security patch cycle with zero downtime on a high-SKU catalogue.
- Optimised database queries and Magento indexing to improve product search performance across 10,000+ SKUs.

QXL Store — www.qxlstore.com · Magento 2, PHP, payment gateway integration

Multi-category retail storefront

- Integrated and stabilised Stripe and PayPal payment gateways, resolving checkout failures that were reducing transaction completion rates.
- Implemented custom checkout flow modifications and order management module enhancements.
- Configured XML sitemap, robots.txt, and canonical tag structure to address crawlability issues.

Cartoli — www.cartoli.com · Magento 2, PHP, React.js, custom theme

Home décor & furniture e-commerce

- Built a custom Magento 2 theme and product display enhancements aligned with client brand guidelines.
- Developed a React-based custom checkout component integrated into the Magento 2 storefront.
- Implemented lazy loading and image optimisation strategies, resulting in a measurable improvement in mobile PageSpeed scores.

LED Xpress — www.ledxpress.co.uk · Magento 2, PHP, MySQL, SEO

LED lighting products · UK retail e-commerce

- Delivered full Magento 2 store setup, extension configuration, and post-launch performance tuning.
- Implemented structured data markup and sitemap configuration to improve organic search indexing.
- Resolved post-launch production bugs across catalogue navigation, checkout, and order processing flows.

EDUCATION

Master of Computer Applications (MCA)

2021

Integral University, Lucknow

Bachelor of Science — Computer Science, Mathematics & Statistics

2018

National PG College, Lucknow

Open to full-time and contract opportunities in Magento 2, PHP, and e-commerce engineering.
